## Data Image

Flow-cytometry

Flow-cytometry using anti-human adrenomedullin antibody. MDA-MB-435 cells were stained with an irrelevant antibody (Blue Histogram) or an anti-human adrenomedullin antibody monoclonal antibody (Catalog # VHE09501, Green Histogram) at a concentration of 5 µg/ml for 30 mins at RT. After washing, bound antibody was detected using a FITC conjugated goat anti-human antibody (Catalog # PHB96441) and cells analysed on a NovoCyt Flow Cytometer.
