Immunohistochemical

IHC-P analysis of kidney tissue by ANXA3 antibody (RHC93701). IHC-P was performed using sections of the formalin-fixed paraffin-embedded kidney tissue; Result: Cells of the outer layer of the renal capsule and cells of partial tubules of kidney are positively stained at the cytoplasm.

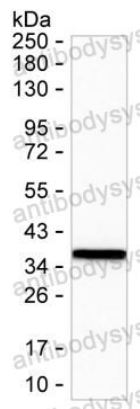

Immunohistochemical

IHC-P analysis of kidney tissue by ANXA3 antibody (RHC93701). IHC-P was performed using sections of the formalin-fixed paraffin-embedded kidney tissue; Result: Cells of partial tubules of kidney, cells of collecting ducts and vascular endothelial cell are positively stained at the cytoplasm and cell membrane.

Immunoprecipitation

Western blot

Lane 1: HeLa lysate ; Lane 2: ANXA3 immunoprecipitated from HeLa lysate by RHC93701; Lane 3: The same as Lane 2 but use IgG isotype control antibody ;Result: RHC93701 can immunoprecipitate ANXA3;
