

# Research Grade Batiraxcept

## Summary

---

|                              |                                                                                                                                                                 |
|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Catalog No.</b>           | DHG78903                                                                                                                                                        |
| <b>Alternative Names</b>     | AVB-500,AVB-S6-500,Aravive-S6,MYD1Fc,Ruga-S6, CAS: 2268717-61-7                                                                                                 |
| <b>Clone ID</b>              | Batiraxcept                                                                                                                                                     |
| <b>Species reactivity</b>    | Human                                                                                                                                                           |
| <b>Form</b>                  | Liquid                                                                                                                                                          |
| <b>Storage buffer</b>        | 0.01M PBS, pH 7.4.                                                                                                                                              |
| <b>Concentration</b>         | 1 mg/ml                                                                                                                                                         |
| <b>Purity</b>                | >95% as determined by SDS-PAGE.                                                                                                                                 |
| <b>Isotype</b>               | Fusion - [AXL (AXL receptor tyrosine kinase, ARK, JTK11, Tyro7, UFO)]2 - IGHG1 Fc (Fragment constant)                                                           |
| <b>Applications</b>          | Research Grade Biosimilar                                                                                                                                       |
| <b>Target</b>                | AXLLG, Growth arrest-specific protein 6, AXL receptor tyrosine kinase ligand, GAS6, GAS-6                                                                       |
| <b>Purification</b>          | Protein A/G purified from cell culture supernatant.                                                                                                             |
| <b>Endotoxin level</b>       | Please contact with the lab for this information.                                                                                                               |
| <b>Expression system</b>     | Mammalian Cells                                                                                                                                                 |
| <b>Accession</b>             | Q14393                                                                                                                                                          |
| <b>Stability and Storage</b> | Use a manual defrost freezer and avoid repeated freeze-thaw cycles.<br>Store at 4°C short term (1-2 weeks). Store at -20°C 12 months. Store at -80°C long term. |

**Note**

For research use only. Not suitable for clinical or therapeutic use.
